EFFEGI BREGA®

"MELANGEUR"

- MIXER -

The vacuum mixer can be used for all the materials that are necessary in dental labs. The device provides excellent results with homogeneous mixtures and without bubbles both in dental plasters and coverings.
The rotation speed is kept constant regardless of the material, the number and the type of cup used.
It is provided standard in wall version or, on request, it can be provided with the specific base to be used as a bench-top model.

Vacuum

It indicates the vacuum reached.

Display

It shows the set time. It decreases to zero after the start..

Time regulation

It allows the adjustment of the minutes set.

Vacuum Start -Stop

It allows to activate the vacuum pump.

Optional

The mixer is provided in the standard version with the 500 gr. cup and with the attacks to be fixed to the wall.
1Kg cup can be required in alternative.
On the right, a picture of the device mounted on a table support (code 182120), provided only on request.
