

**EFFEGI BREGA®**

# STEAM BOX

- Optional accessory -

This washing cabin allows to reduce the spread of vapor particles during the cleaning operations with steam generators. The stainless steel compact structure can easily be placed next to the steam generator.

It is equipped with a tank underneath for collecting decantation water but it can also be connected directly to the laboratory decanter.

This device allows to operate easily, while maintaining a clean working environment.

It is provided with CE marking.
