

EFFEGI BREGA®

- Sandblaster -

“ALOX PLUS”

ALOX PLUS is the evolution of the sandblaster Alox 2001 specially designed and built to meet the needs of dental professionals.

• **ERGONOMIC** • **FUNCTIONAL** • **WITH SOME ACCESSORIES**

ALOX PLUS comes with a series of innovations designed to optimize its use and address the problems daily. The sander should be connected to a vacuum cleaner to remove dust that form in the work area during the blasting.

In the upper right there is a fitting for connection to the fan already in the laboratory or with the AS 800 silent vacuum of Effegi Brega

CONTAINERS
