

EFFEGI BREGA®

MINIVAPOR KRONOS

- STEAM GENERATOR -

The smallest appliance in the EFFEGI BREGA range. A device which respects the tradition of solidity, practicality and long-lasting life of our products. The connection to the water supply is not required. Quick and easy to install: simply pour decalcified water in the tank and insert the power plug. Easy to use: 8 minutes after the switching on, the appliance will be ready to use. Just top up the water tank when the warning lights indicates it.

Decalcified water tank

- Independent tank which makes the device portable.
- Easy filling: 65mm Ø inlet hole.
- It is possible to top up the tank without switching the appliance off.

GUN

Steam outlet

- Practical, with excellent thermal insulation.
- Great manageability and ease to use.
- Manageable control button.
- Ergonomic and with reduced dimensions.
- Light and suitable for small hands.

Components

- AISI 316 L stainless steel boiler.
- Boiler insulation resistant to 200 ° C.
- Satin stainless-steel casing.
- Varnished aluminium lid.
- Copper tubing.
- Brass fittings.
- Numbered safety valve set at 5.5 bar.

Water refilling warning light

- When the light is on, it indicates that there is no water in the tank. The appliance remains in stand-by and under pressure. Simply top up to continue working.

Control lights

- The left pilot light indicates the operation of the heating resistance.
- The right pilot light indicates a low water level in the boiler and the operation of the water filling pump.
