

EFFEGI BREGA®

MINIVAPOR KRONOS PLUS

Steam generator

Developed for the watch industry, this steamer has also turned out to be ideal for the dental sector. The possibility of setting the steam pressure from 4 to 8 bar makes it a versatile and efficient device. No need for connection to the water mains and it is easy to install. Solid, compact and simple to use: just top up the water tank with decalcified water and after 8 minutes the device is ready for use.

DECALCIFIED WATER TANK AND FLOW RATE REGULATOR

- Independent tank, which makes the device portable
- Easy loading: hole \varnothing 65 mm
- It is possible to top up the tank without switching the device off, avoiding waiting time
- Easy-access steam flow rate regulator to reduce the power of the 8 available bar

GUN

- Practical, with excellent thermal insulation
- Great manageability and ease to use
- Manageable control button
- Ergonomic and with reduced dimensions
- Lightweight and suitable for small hands

COMPONENTS

- AISI 316 L stainless steel boiler
- Boiler insulation resistant to 200° C
- Satin-finished stainless-steel structure
- Varnished aluminium casing
- Copper tubings
- Brass fittings
- Numbered safety valve set at 10 bar

PILOT LIGHTS

- The pilot light on the left indicates the operation of the heating element
- The pilot light on the right indicates low level inside the boiler and the operation of the electric pump for water filling

WARNING LIGHT FOR WATER REFILL

When the light is on, it indicates the absence of water in the tank. The device remains in stand-by mode and under pressure. Simply top up to continue working
