

EFFEGI BREGA®

MINIVAPOR MS 2005

- STEAM CLEANER -

A deep understanding of lab problems and more than 20 years of experience in manufacturing steam cleaners allow us to offer the most technologically advanced and suitable model to meet the lab actual needs.

Saturated Steam

- Bridges decontamination.
- Ceramic cleansing.
- Foot switch in compliance with safety norms.

Spray Gun

WATER – STEAM – SPRAY

- Practical with high heat insulation.
- Ergonomic and user friendly.
- Control lever with variable intensity.

Digital Thermoregulator

Adjustable working pressure from 0.02 to 0.8 MPa, according to the operator's needs.

Purified Water

- Water dispensing for:
 - coatings mixture;
 - plasters mixture;
 - ceramic tools cleansing.
- Foot switch in compliance with safety norms.

Electric Liter-counter

- In order to top up demineralized water and to avoid large limestone deposits, the led shows the exact consumption of the liters of water used for the regeneration of the purifier in due course.
