

EFFEGI BREGA®

VAPOR KLEIN VK500 TOUCH

Steam generator

The top of the range of the IV-Line. This device has the ability to set the operating pressure up to 8 bars.

In addition to the spray gun, the device is equipped with a the fixed nozzle for saturated steam.

The touch screen makes its use easy and intuitive. The device software is designed to count the liters consumed and signal the need to regenerate the water softener resins.

FIXED NOZZLE

It delivers saturated steam for:

- Decontamination of bridges
- Ceramic cleaning

It is activated by button or pedal

GUN

- It delivers: water, steam and water/steam mixture
- Practical with thermal insulation
- Ergonomic and easy to use
- Trigger to activate the gun

ADJUSTABLE PRESSURE

Adjustable operating pressure from 2 to 8 bars, as needed

ELECTRIC LITRE-COUNTER

The display indicates the exact quantity of water used by the device, in order to signal when it is necessary to carry out the regeneration of the resins of the water softener combined with the steam generator

PEDAL

To be used in place of the button to control saturated steam delivery from the fixed nozzle
